

## Instructions to enable Zoom real-time translation captions into another language

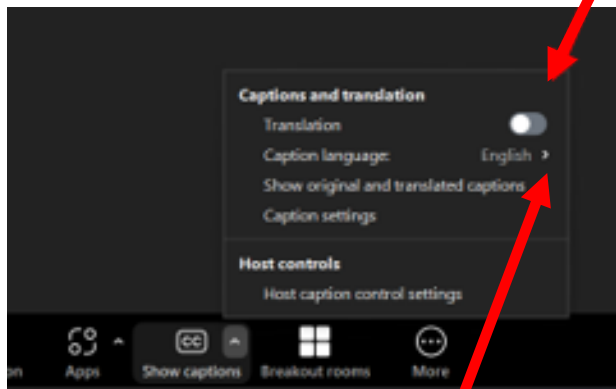

If the speaker is presenting in another language and you want the **Captions** to be generated into your language, Zoom can translate the captions into your preferred language. This is done in real-time during the meeting and must be set by each individual participant.

Once you have joined the Zoom meeting:

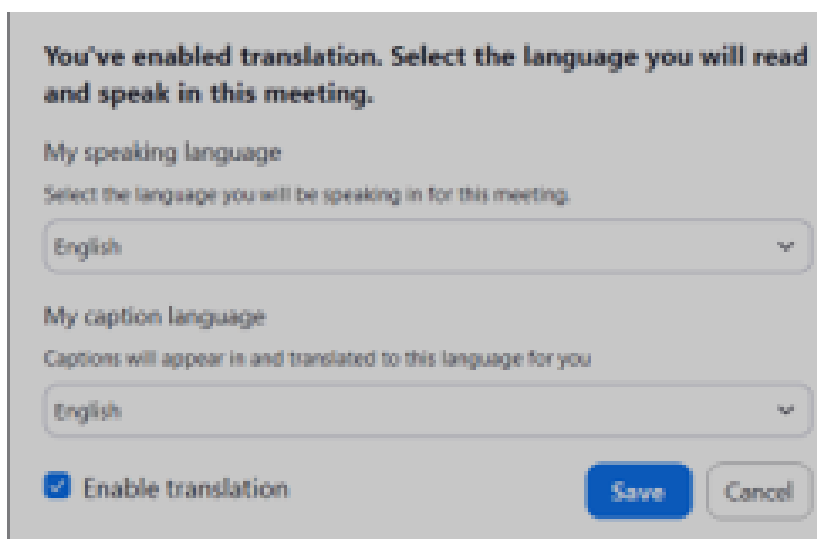

1. On the bottom bar, *click* on **Show captions** icon

2. Under **Captions and translation**, enable **Translation** (*click on the button on the right, it will change colour*)

3. On the **Caption language** option, click on the arrow to see available languages, select your language from the list
4. Click **Save** to confirm your speaking and caption language

5. Once a language is chosen, the captions will be generated and translated into that language for you. Other participants can choose a language for their captions independently of your chosen language
